This is a translation of a 31,790 page book about Israeli Inventions. The book is divided into 21 chapters, each covering a specific invention, and a TIMELINE with end matter at the back.

The writing is modern and easy to read, and written in an easy, breezy style. Some of the language covers medical, scientific and technical subjects.

NOTE The translation must be in USA neutral Spanish, as it will be launched in the USA market to the Hispanic and Latino populations.

End date for completion is July 3rd, though if possible we would like it sooner.

Please bid on the entire project. Thank you very much.

I am seeking a translator to translate my book from English into Spanish.

The book is self published and contains 146 pages. It describes how to use an Abacus.

The book was initially intended for children to learn this skill, so the content of the book is fairly basic and easy to follow and at times rather repetitive. The book contains literally hundreds of pictures of the different stages of how to use the abacus, which are shown through the examples contained in the book.

I can email you a PDF file of the book, so that you can see the total content, before you give me a quotation.

He even helped me choose a more punchy and catchy title. Jorge goes the extra mile and overdelivers and I rate him very highly."

Hi Jorge,

This is a very similar job to last time, in a slightly different niche.

I have an ebook in English language that needs translating into Spanish. The ebook is a natural health program and is written in straightforward English.

It consists of 13 800 words of text.

The terms and jargon used are the same as last time and you may actually find it's useful to refer to your previous translation.
